COMPACT QUIET-FLO BLOWER

Balboa is rounding out its portfolio of heated and non-heated bath blowers with the addition of the new Compact Quiet-Flo with built in controls. All models have compact designs which allow for constrained space installations. Additionally, the Quiet-Flo's air intake is below the output so that the blower can be mounted against a wall without any concern for flow restrictions. The blower will work with any Balboa air or electronic control system and comes with a standard NEMA plug. Optional unionized connections and check valves are available.
