Smooth Barb x 1" Slip

Micro V Jet Body 3/8" x
26mm Smooth Barb

The compact design of the Micro V-Jet Flow Adjustable series snaps into place, increasing ease of installation. Utilizing the V-Jet body technology to prevent water and chemical build-up, the jet body also has a built-in adjustable switch allowing the bather to turn the jet on or off with the touch of a fingertip.

The Micro V-Jet Flow Adjustable series features two jet body styles, accommodating most whirlpool baths. The jet bodies are equipped with silicone injection ports in order to maintain the tightest water seal possible. Contact your BWG sales representative today for more information.
