

PetiteJets

Your Single Source Solution

- 100% customizable
- Has long threads compatible with marble tubs
- Non-adjustable and adjustable flows with partial or complete shutoff
- Comes in rotary and directional barrel assembly for unique comfort

PetiteJets

NEW 100% Shut OFF Neck Jet. Balboa Water Group is proud to introduce the new Petite Jet--the ideal jet for neck jet clusters.

The Petite Jet is 100% adjustable. It is easily controlled by the end user with a simple turn of the barrel, has a 100% shut off, and provides more options to the end user for their personal massage experience.

The Petite Jet is offered in a rotary and directional barrel assembly. It is 1.65" in diameter and has a minimal height of 0.4", which allows for minimum protrusion from the spa wall, leaving a smooth and comfortable surface.

The 100% customizable, proprietary design allows you to stand out from the rest of the crowd and be a step ahead of your competition. The Petite Jet is by far the best choice in small jets on the market.

Features

- Bathing well interchangeable and serviceable.
- Long threads for marble tubs.
- Non-adjustable and adjustable flows with partial or complete shutoff.

Options
