Universal Spindle Replacement Kit

The Universal Spindle Replacement Kit is the perfect solution for your spa filtration system. Located between the skim filter and pump, the kit is a self-contained unit that accommodates popular pleated filters or the newer high density micron filters.

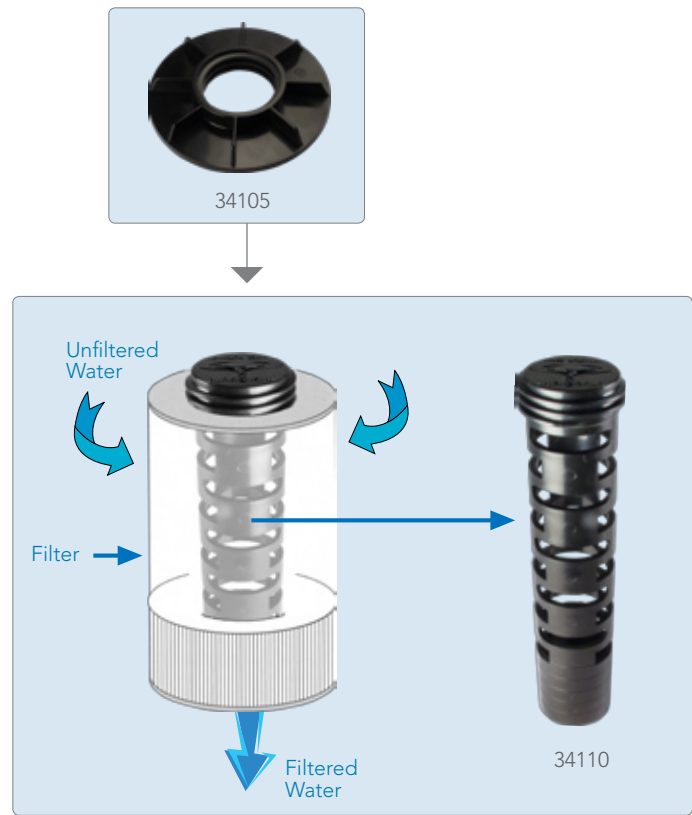

The Universal Spindle Replacement Kit was designed to support any filtration system quickly with minimal problems. Five available threaded fittings adapt to most spa filtration systems.

The length of the filter spindle can be modified easily by simply cutting one end. The spindle is conveniently marked to help in the process.

The inherent design of the filter spindle is not affected by length modification. The large openings in the spindle allow for maximum water flow and efficiency.

Once installed, filter replacement is a snap! Unscrew the filter lid, remove the filter and replace it, and then screw on the filter lid. All done!

MATERIAL NO.	DESCRIPTION
34105	Filter Lid
34110	Filter Spindle
34115	1½" X 1½" NPSM FILTER ADAPTOR
34120	1½" x 2" AMCE THRDS FILTER
34121	1½" X 2" SPIGET FILTER ADAPTOR
34122	1½" x 2" NPSM Filter ADAPTOR
34125	1½" x 2¼" AMCE THRDS FILTER
