

Bathe Luxuriously

## V-JetFlow Adjustable Series

Intuitive Adjustable Design

- Turn On or Off with a simple twist
- Unique "V" shape prevents water build-up
- Silicone injection ports create a tight water seal
- V-Jet bodies are available to suit any whirlpool bath plumbing
- Available in scalloped or smooth, and in multiple colors and metal finishes

**BALBOA**  
water group

The **V-Jet Flow Adjustable Series** was designed to give you maximum flexibility inside and outside of the bath. The adjustable jet allows the bather to turn jets on or off with the touch of a fingertip. The unique "V" shaped jet body prevents water and chemical build-up.

The V-Jet Flow Adjustable Series features two jet body styles, accommodating most whirlpool baths. The jet bodies are equipped with silicone injection ports in order to maintain the tightest water seal possible.

Contact your **BWG sales representative** today for more information.
